- Patented insulated dry-bag design
- Multiple clip attachment points & bungee webbing
- Welded seams / no zippers
- Keeps ice intact for up to 24 hours
- Rolls up for easy storage
- TriFold DriTop™ + FortiStrap™ System
- 1000 denier MuleSkinET™ exterior
- Heavy-duty embossed MuleSkinEV™ interior
- PolarLayer™ Insulation

How to use your IceMule Pro Catch Cooler.

You wanna do this right because it helps the IceMule work its best.

Preparing your IceMule for use. When your IceMule first arrives, most of the air in between the two insulating walls has been forced out for packing. To get your cooler back into shape follow these steps:

- **Step 1:** Unroll your IceMule and open the air valve.
- **Step 2:** Push down on the bottom of the cooler from the INSIDE with your open hand - palm to the bottom - to force the cooler back into shape.
- **Step 3:** Add a little air through the air valve if necessary. Once the cooler has settled into shape, close the air valve and you're ready to go!
- **Step 4:** Before launch, fill the IceMule Pro Catch with a bag of ice & close it (see below) - that way your catch will be on ice!

Closing the IceMule:

- **Step 1:** Put ice, fish, etc stuff you need cold in the IceMule.
- **Step 2:** Hold the IceMule with the logo on top and FOLD the top over 2 - 3 times. FOLD. DON'T ROLL. That's important.
- **Step 3:** Pull the two ends of the top back towards you & lock into place. Pull the two straps in back through the top closure opening and clip them to the buckle points in front. Now you have a water-tight seal.

Rolling up the IceMule:

- **Step 1:** Lay the IceMule logo down and pull the air valve tab open.
- **Step 2:** Starting at the bottom, roll up, forcing excess air out as you go. Place the IceMule in its stuff sack to prevent unrolling.

Even Mules need a little TLC.

Yes, we've got a 90-day unconditional guarantee. But you should still be nice to the Mule.

Do not place anything inside that can puncture the IceMule. **If your catch has sharp barbs, fins, etc. trim them off before placing it in the IceMule Pro Catch.** After each use, clean the inside out with warm water and wipe dry.

You can add air to the insulating layer by blowing in the air valve - adding air can help insulation but will make the IceMule more difficult to close - experiment to get the right level for you. But water can ruin your insulation so remember to always close the air valve!

90 Day Unconditional Money Back Guarantee: If you are unsatisfied with the IceMule for any reason, just return it within 90 days and we'll gladly refund the purchase price. Questions? drop us a line at customer@icemulecoolers.com.au

It's *your* adventure. Stay cool.
